## [ABSTRACT]

There are provided a phosphor and a light emitting device using the same, wherein in order to embody a desired wavelength of light, in a state where a first phosphor and a second phosphor are mixed in a light transmitting member, both of light excited by an excitation light source and the excitation light source are emitted to the outside and embody a white light source. Further, the first phosphor has a chemical formula of  $Sr4-_xMg_yBa_zSi_2O_8:Eu_x^{2+}$  (0 < x < 1, 0  $\le$  y  $\le$  1, 0  $\le$  z  $\le$  1) and the second phosphor has a chemical formula of  $Sr3-_xSiO_5:Eu_x^{2+}$  (0 < x  $\le$  1).
